Plant and Soil **144**: 317–319, 1992.

Contents of Volume 144 1992

Volume 144, No. 1

B. Heijne, J. J. Hofstra, G. W. Heil, D. van Dam and R. Bobbink, Effect of the air pollution component ammonium sulphate on the VAM infection rate of three heathland species 1
L. M. Dandurand and J. A. Menge, Influence of *Fusarium solani* on citrus root rot caused by *Phytopthora parasitica* and *Phytophthora citrophthora* 13
J. A. Doughton, I. Vallis and P. G. Saffigna, An indirect method for estimating ^{15}N isotope fractionation during nitrogen fixation by a legume under field conditions 23
S. J. González-Prieto, M. C. Villar, M. Carballas and T. Carballas, Nitrogen mineralization and its controlling factors in various kinds of temperate humid-zone soils 31
S. V. Dobritsa and S. N. Novik, Feedback regulation of nodule formation in *Hippophaë rhamnoides* 45
J. S. Sun, R. J. Simpson and R. Sands, Nitrogenase activity of two genotypes of *Acacia mangium* as affected by phosphorus nutrition 51
G. H. Canullo, R. Rodriguez-Kabana and J. W. Kloepper, Changes in the populations of microorganisms associated with the application of soil amendments to control *Sclerotium rolfsii* Sacc. 59
S. S. Gnanamanickam, B. L. Candole and T. W. Mew, Influence of soil factors and cultural practice on biological control of sheath blight of rice with antagonistic bacteria 67
B. L. Williams, Nitrogen dynamics in humus and soil beneath Sitka spruce (*Picea sitchensis* (Bong.) Carr.) planted in pure stands and in mixture with Scots pine (*Pinus sylvestris* L.) 77
M. Reeves, The role of VAM fungi in nitrogen dynamics in maize-bean intercrops 85
G. Johansson, Below-ground carbon distribution in barley (*Hordeum vulgare* L.) with and without nitrogen fertilization 93
S. Recous, J. M. Machet and B. Mary, The partitioning of fertilizer-N between soil and crop: Comparison of ammonium and nitrate applications 101
D. Du and D. D. Baker, Actinorhizal host-specificity of Chinese *Frankia* strains 113
T. C. Todd, S. W. James and T. R. Seastedt, Soil invertebrate and plant responses to mowing and carbofuran application in a North American tallgrass prairie 117
D. G. Milchunas, C. A. Lee, W. K. Lauenroth and D. P. Coffin, A comparison of ^{14}C, ^{86}Rb, and total excavation for determination of root distributions of individual plants 125
M. Niemi and M. Vestberg, Inoculation of commercially grown strawberry with VA mycorrhizal fungi 133
A. C. Kennedy, H. Bolton, Jr., H. F. Stroo, L. F. Elliott and J. K. Frederickson, Competitive abilities of Tn*5* Tox– mutants of a rhizobacterium inhibitory to wheat growth 143

Volume 144, No. 2

J. Magid and N. E. Nielsen, Seasonal variation in organic and inorganic phosphorus fractions of temperate-climate sandy soils 155
A. Mozafar, F. Duss and J. J. Oertli, Effect of *Pseudomonas fluorescens* on the root exudates of two tomato mutants differently sensitive to Fe chlorosis 167
J. Lecoeur, J. Wery and O. Turc, Osmotic adjustment as a mechanism of dehydration postponement in chickpea (*Cicer arietinum* L.) leaves 177
N. Mihailović, G. Jelić, R. Filipović, M. Djurdjević and Ž. Dželetović, Effect of nitrogen form on maize response to drought stress 191
B. Dinkelaker and H. Marschner, In vivo demonstration of acid phosphatase activity in the rhizosphere of soil-grown plants 199
W. A. Neilsen, W. Pataczek, T. Lynch and R. Pyrke, Growth response of *Pinus radiata* to multiple applications of nitrogen fertilizer and evaluation of the quantity of added nitrogen remaining in the forest system 207
S. Rosendahl, Influence of three vesicular-arbuscular mycorrhizal fungi (Glomaceae) on the activity of specific enzymes in the root system of *Cucumis sativus* L. 219
H. A. Chulan and K. Martin, The vesicular-arbuscular (VA) mycorrhiza and its effects on growth of vegetatively propagated *Theobroma cacao* L. 227
D. Vidal, J. Martinez, C. Bergareche, A. M. Miranda and E. Simon, Effect of methabenzthiazuron on growth and nitrogenase activity in *Vicia faba* 235
I. Lyngstad, Effect of liming on mineralization of soil nitrogen as measured by plant uptake and nitrogen released during incubation 247
R. Sarimento, A. Villegas, C. Mazuelos, J. L. García and A. Troncoso, Influence of the nitrogen source and concentration on N fractions and free amino acid levels of grape vine explants 255
P. F. Grierson, Organic acids in the rhizosphere of *Banksia integrifolia* L.f. 259
O. Kleifeld and I. Chet, *Trichoderma harzianum* – interaction with plants and effect on growth response 267
Z. H. Shamsuddin, R. Kasran, D. G. Edwards and F. P. C. Blamey, Effects of calcium and aluminium on nodulation, nitrogen fixation and growth of groundnut in solution culture 273
F. P. C. Blamey, D. C. Edmeades and D. M. Wheeler, Empirical models to approximate calcium and magnesium ameliorative effects and genetic differences in aluminium tolerance in wheat 281
R. H. Teyker, Seedling responses to band applied NH_4OH rates and to N form in two maize hybrids 289
S. A. Materechera, A. M. Alston, J. M. Kirby and A. R. Dexter, Influence of root diameter on the penetration of seminal roots into a compacted subsoil 297

Short communications

T. de Koe, K. Geldmeyer and N. M. M. Jaques, Measuring maximum root growth instead of longest root elongation in metal tolerance tests for grasses (*Agrostis capillaris, Agrostis delicatula* and *Agrostis castellana*) 305
S. V. Hedge and G. P. Brahmaprakash, A dry granular inoculant of *Rhizobium* for soil application 309
